

DB HIFI OPEN EVENT

Friday 4th December 2015 15:00 to 21:00

&

Saturday 5th December 2015 10:00 to 17:00

DB HIFI will be hosting an exciting open event, with demonstrations and representatives from three prestigious brands:

clearaudio[®]
High End - made in Germany

isoTek[®]

LEEMA
ACOUSTICS

Bring your favourite vinyl along, as we shall have *What Hi-Fi's* 2015 Award winning **Clearaudio Concept MM** and **Performance DC** turntables on demonstration, as well as their reference level **Compact Innovation** and **Master Innovation** turntables, which feature much of the technology found in the company's flagship Statement model.

Whether you are a staunch believer or hard core sceptic concerning the subject of mains conditioning, why not come along and let your ears be the judge! We shall be discussing the principles and benefits of optimised mains quality and demonstrating how appropriate mains conditioning can improve your system. From simple generic mains blocks, right through to **isoTek's** impressive **Titan** system, their range will be on constant demonstration.

Receiving a "highly commended" accolade in *HiFi News* magazine, **Leema's Libra reference DAC** will be on demonstration, together with the stylish **Hydra II power amplifier** and the compact **Elements** range. We are also very excited to have the new **Quasar** integrated home audio solution, which is due to launch later this year. The **Quasar** is a one box solution for all your hi-fi needs.

During the event there will be a prize draw to all those who attend and one lucky winner will receive an EVO3 Premier mains cable and an EVO3 Polaris power distribution strip. To enter, either join our [Facebook event](#) or fill in a competition card upon arrival.

Hopefully you are as excited as we are to be getting to play with some truly incredible kit, enjoy some great company, drinks and what's more, fantastic music!

We look forward to seeing you!

James Dean
